## Directions from National Western Stock Show

- ☆ Take the I-70 west ramp, merge onto I-70 west.
- ☆ Take the I-25 north exit, exit #274, toward Fort Collins, merge onto I-25 north
- ☆ Take the I-76 east exit, exit #216A, towards Fort Morgan, merge onto I-76 east
- ☆ Take the US-85 north exit, exit #12, on the left toward Brighton/Greeley, merge onto US-85 north.
- ☆ Turn west onto E 124th Ave. 124th Ave. becomes Henderson Rd. to Adams County Regional Park.

## Bus Transportation from National Western Stock Show grounds to the **WILD WILD WEST SALE.**

### There will be two departures:

3:30 pm and 4:30 pm or following the National Western Stock Show Simmental bull show.

Please sign up at the Colorado Simmental Association booth before noon on Tuesday, January 17, 2012.

"Welcome to the 2012 Wild Wild West!" We are pleased to host another outstanding sale offering. These are honest cattle, "bred to be cows"... backed by cattle people who breed them to work in some of the harshest range conditions in North America. It proves the Simmental and SimGenetics females can work in any environment. And the Wild Wild West sale showcases our breeding programs.

Come look us up in the yards. Several Wild Wild West consignors will be exhibiting in the female Simmental Pen Show. The female pen show is Sunday, January 15th. The bulls show is Monday, January 16th, with the One Sale that evening.

The Colorado Simmental Association works hard to make the National Western Stock Show Simmental events a reality. They are a small, but mighty group! Almost single handily, they put on the National Western Stock Simmental Show. So to help defray some of those costs, the Wild Wild West will donate the Lot 1 semen tank and semen donation proceeds. We appreciate your support of this lot!

Denver will again be the home of the American Simmental Association Annual Meeting and the National Simmental show. You will want to come and take part of the business of our breed. We look forward to seeing you at the annual meeting and all the Denver Simmental events.

This year we have invited past sale supporters to consign to the 2012 Wild Wild West Sale. Hudson Pines Farms, New York, Sanders Ranch, Kansas, Oval F Ranch, Missouri, Eichacker Simmental, South Dakota as well as several Colorado breeders have consigned some top lots to this year's event. We are excited about these outstanding operations who have not only supported our past sales, but are back consigning to the Wild Wild West!!

We appreciate all our past buyers and look forward to seeing you back at this year's sale during the National Western Stock Show. Adams County Fairgrounds is only a few extra miles from the Denver grounds, but it is worth the effort and the trip.

Call any of the consignors, Doug Parke, Drew Hatmaker or ASA Field Representatives for additional questions regarding the Wild Wild West consignments. We look forward to seeing you the evening of Tuesday, January 17th, 2012 at the "Wild Wild West

Willie and Sharon Altenburg

Altenburg Super Baldy Ranch is located in northern Colorado and has been operating there for the past nearly 40 years. Altenburg's emphasis is producing commercially oriented bulls for western bull customers. We utilize both Simmental and Angus genetics .... Red and Black. Simmental is utilized for adding growth and yield. Angus is used for calving ease and to add carcass quality. Both breeds have exceptional maternal traits, making the SimAngus females the most sought after cross in the industry. The resulting SimAngus – "Super Baldy" bulls are utilized by producers wanting just a little continental blood or to stabilize a crossbreeding program. We sell 100 bulls and will hold our 20th annual Super Baldy Bull sale the 17th of March in 2012. Our cattle are summered at 6 – 7000 feet in "short grass" country requiring 20 acres per cow in the summer. Cows are "trailed" the 12 miles from the ranch each year. Cows are wintered on hay stubble, and corn stalks and calved outside. We try to run them as our commercial customers do. Both A.I. and embryo transfer are utilized to make

improvements in genetic progress. Please go to our website and learn more about our program .... [www.altenburgsuperbaldy.com](http://www.altenburgsuperbaldy.com)

We have been a part of the Wild Wild West Sale since its inception and are proud to be a Wild Wild West member. This group of western cattlemen has enjoyed bringing sound, useful cattle that will work in range conditions when you take them home. We say they are "bred to be cows". Many will work for show heifers, and youth projects, but ultimately, they will become productive cows.

We are pleased to have Bruce German as the cattle manager of our operation. Many of you know Bruce as past Colorado Simmental Association President

And finally, we value the National Western Stock Show and the Wild Wild West Sale as a time when we reunite with family and friends. We look forward to seeing you at the sale.

All Altenburg heifers are tested negative PI-BVD.

These four heifers will be part of our purebred "pick" Pen of 3 and we will be offering "pick" in the sale. Ultimately, these are the pick of our 2011 heifer calf crop. The ASR/GLS Pacesetter females are outstanding. Jim Benda, South Dakota, picked him out of our 2009 sale as our high selling bull and both of us have used him heavily. If you like females with a brood cow look, you will like Y194 and her sisters. She had a weaning weight ratio of 106.

## COW CAMP RANCH

Kent, Mark and Nolan Brunner

3553 Upland Road • Lost Springs, KS 66859

785-983-4483 • [www.cowcampbeef.com](http://www.cowcampbeef.com) • [nolan@cowfampbeef.com](mailto:nolan@cowfampbeef.com)

Cow Camp Ranch (ASA member #3790) was established in east central Kansas on the western edge of the well-known Flint Hills native grassland. The Seed Stock headquarters are located a mile off the legendary Santa Fe Trail and near the old lost springs of Lost Springs, KS. Cow Camp is a family owned operation, now in its fifth generation. We have been a farming and ranching family from the beginning and it has and always will be our way of life.

At Cow Camp we breed our cattle to fit the commercial industry. They are bred heavily on economic traits so the bulls will work for the commercial cowman and the females will raise the next generation of bulls. With that in mind, our cows spend the majority of their time grazing native bluestem grass with supplemental hay and protein as needed. We have utilized an intense AI and ET program in both our spring and fall herds that has played a major role in the progress of our herd. We run our registered Angus herd side by side with our Simmental and SimAngus cows and have learned to respect both breeds for what they bring to the Beef industry. In addition to our seed stock operation, we own and operate a commercial feed lot. This has been a big influence on our focus on the real world of

selling cattle by the pound based on feed lot performance and carcass merit.

Kent, Mark, and Nolan (Kent's son) Brunner manage the seed stock operation while Tracy Brunner (a brother to Kent and Mark) works primarily on the Feed Lot side of the family partnership. Over the years our family has been heavily involved in the ASA Junior Program and has found it to be very rewarding. In all, there have been ten Cow Camp Junior members in past years. Attending a regional or national show is about as close to a summer vacation as we get.

We are very excited to be a part of the Wild West Group and would like to thank them for the opportunity to work with them. It is always a pleasure to work with knowledgeable cattlemen and women. We look forward to seeing you all in Brighton this coming January.

Selling 5 embryos and guaranteeing 2 pregnancies. We are offering 5 frozen embryos out of one of our leading Simmental donors, CCR Ms 4045 Time 7322T, and the extremely popular Genex bull Triple C Singletary. 7322T is a long bodied clean fronted In Dew Time daughter with an excellent udder. She combines lots of power with a long stride. These purebred Simmental embryos should be really good with great numbers as well. We have some Singletary calves on the ground from last fall and they are stout and deep. 7322T is homozygous black and homozygous polled as will be these 5 embryos. Selling 5 frozen transferable embryos and guaranteeing 2 pregnancies if work is done by a certified embryologist.

## BRIDLE BIT SIMMENTALS

Erroll and Gayle Cook Family

Box 507 • Walsh, CO 81090

(719) 529-0564 • (719) 324-5542 • (719) 324-5474

kcdcl@centurytel.net

(Left to Right) Austin, Montana, Christopher, Dakota, and Darin

Gayle (1945 – 2011) and  
Erroll Cook

Bridle Bit Simmentals ASA#4086 is located in the short grass country of extreme southeast Colorado. Total herd enrollment has always been an important part of our program, as is proven with our Performance Activate Scores. Birth weights, wean weights, and yearling weights are reported on every animal, as well as ultrasound data, carcass data and hip height. The accuracy and honesty involved in complete data submission is something we are very proud of.

2011 calving season went off without a hitch, but as springtime rolled around, a severe drought forced Bridle Bit Simmentals to alter their normal practices after AI season. Thanks to the generosity of bull buyers Chet Gebauer and family, all bull calves and dams were trucked five hours north to greener pastures. Heifer calves stayed close to home and were supplemented throughout the summer. Recent moisture has encouraged us to look forward to 2012.

Bridle Bit Simmentals replacement heifers and prospective breeding bulls are selected based on performance data, visual appraisal, and disposition. Bulls are sold exclusively by private treaty, relying heavily on word of mouth and reputation for promotion. Any progeny that does not meet the

selective criteria which is to avoid extremes, with emphasis placed on calving ease, are placed in the BBS feedlot and sold on the grid to US Premium Beef. This year's calves earned a premium of \$35.45 per head. Carcass data results were as follows: 95% graded choice or higher and 66% were yield grades 1 and 2.

It has been a difficult year for the Cook family. After a 2 ½ year battle with breast cancer, Gayle went to be with the Lord on March 25, 2011. Erroll described it best at her funeral when he said that our family was like a wheel; we are all spokes, but we lost our hub. We continue to go on day by day because that is what she would have wanted, but we do so with heavy hearts. She is greatly missed by her family and friends.

Bridle Bit Simmentals genetics have been spread over the United States and Canada because of the involvement with the Wild Wild West Simmental Sale. We trust you will find our females worth your time and consideration. All offerings have tested negative for PI-BVD. Thank you and we'll see you in Denver!

Maybe our best female offered in the 2012 Wild Wild West Sale. Her maternal sister sold in last year's sale to Mieklejohn Ranch of Collbran, Co. Cattlemen will like this heifer. Our philosophy is to produce females sound in their structure with lots of capacity. This offering is that heifer.

## CARSTEN SIMMENTAL

Bill and Ruth Carsten  
226 Poplar • Hotchkiss, CO 81419  
(970) 872-2669

Carsten Simmentals is a family owned and operated ranch that runs over 320 cows in the mountain region of western Colorado. Our winter range is in Hotchkiss, Colorado, with the herd traveling up to 10,200 feet during the summer months. The bulk of the workload has been and still is handled by the immediate family members. Bill handles the primary workload with daughters Ce'rra and Taylor, and brother Mike sharing responsibilities with calving, gathering, processing, shipping and numerous other jobs.

Our herd has been built from the ground up using the best bulls available through artificial insemination. We stepped into the Simmental business in 1975, and moved up to the purebred market in 1981. The emphasis of our breeding program has been to produce solid colored, polled, seedstock that is moderate framed, easy keeping cattle that will perform from calving to slaughter. The success

that we have had with past performance evaluation programs with our bulls has led to a good following in our "Best of the Rockies" Bull Sale held at the Delta Sales Yard the first Thursday in March.

We would like to thank the Wild Wild West members for the opportunity to participate in past sales as a guest consignor and thinking enough of our past offerings to be included as a full time member. Please accept this as my personal invitation to come join us at the Wild Wild West Sale and view our 2012 consignments. Your consideration is appreciated.

X052 is a solid black heifer that is easy to like and should be on everyone's list on sale day. The Dream On daughter is deep and wide and the kind that will be a big time cow for any breeding program. She was our top heifer in our 2010 group and will remind you of the Dream On heifer that Pine Ridge bought in a past Wild Wild West Sale. Donor material???? We will let you decide! One thing I do know is that when you have this overall stout design, she will raise some powerful calves.

# COLORADO SIMMENTAL ASSOCIATION & GUEST CONSIGNORS

The Colorado Simmental Association was formed in August 1970 to promote Simmental genetics. Today it totals 25 ranch memberships, representing a wide range of operation sizes and geographic diversity. Though small in membership numbers, the CSA has a full plate of activities. CSA annually organizes and runs the National Western Stock Show breed events. This includes the yard's bull and female pen shows, plus the popular People's Choice Power Bull. CSA also coordinates the hill shows and oversees The One Sale at Denver. CSA's numerous volunteers provide countless hours to bring you a week of Denver's Mile-High magic.

CSA volunteers also coordinate the breed's Colorado State Fair show and helped host a multi-breed educational field day this fall.

Colorado's junior membership helps with the various shows and functions at both Denver and Pueblo. The juniors reap many rewards, such as the financial boost given by Wild, Wild West Sale partners, who donate the Lot 1's semen and embryo proceeds to aid both associations. CSA also annually presents youth scholarships, plus helps defray expenses to encourage participation in the AJSA summer show schedule. CJSA members compete in numerous contests during their annual Field Day weekend event. CSA also sponsors awards annually to Simmental sired Champions at County Fairs across the state.

**\* Hudson Pines Farm • David Rockefeller, Owner; Miranda Kaiser, Owner/Executive Director; John Walston General Manager, (518) 376-7887; Ryan Haefner, Farm Manager, (815) 499-0522 • Sleepy Hollow, NY**

Hudson Pines Farm was started with a commitment by the late Peggy Rockefeller, who dedicated her life to the preservation of agriculture and the advancement of the Simmental breed. Hudson Pines Farm has been in the Simmental business for over two and a half decades. We use an extensive embryo program to further enhance the production of superior females. The HPF influence is being felt across the United

States and foreign countries by cattlemen and producers who have selected for performance in their cattle, through the use of HPF genetics. Our cows have volume, capacity, spring of rib, and can thrive in any environment, while raising the kind of calves that fit the market.

At a time when optimizing performance is critical to maximizing profits, HPF cattle will work for you. They are predictable, consistent and reliable. They are the kind of cattle that we need now, and in the years to come. Our customers are #1 with us. They know we stand behind our cattle and when they buy from us they are buying dependable cattle backed by dependable people. Again, thank you ever so much and we look forward to many more prosperous and exciting years to come.

**\* Sanders Ranch, LLC • Steve and Margaret Sanders • Louisburg, KS • (913)377-2200, office • Darrin Barbour, manager • (816) 898-8990, cell • darrinl@fairpoint.net**

Sanders Ranch is nestled between the Ozarks of Missouri and the Flint Hills of Kansas. It's a 1000 acre, 250 cow operation that is owned by Steve and Margaret Sanders. They began in 1970 when Steve bought his first set of Angus cows, and has built a solid foundation for today's herd. Our commitment to breeding superior beef cattle has never been stronger than it is today. Every day we strive to get better in all facets of our seedstock operation, so we can provide a better product to our customers. Our SUCCESS is solely based on the SUCCESS of our customers.

**\* Oval F Ranch • Don and Marilyn Fischer • Winston, MO • (816) 392-8771 • Matt & Andrea • St Joseph, MO • (816) 383-0630 • www.ovalfranch.com**

Oval F Ranch was founded in 1971 with the purchase of 7 half Simmental bred heifers. One of those heifers was the base for our Princess-Julie-Ringleader cow family. We have turned 14 generations in that cow family, all AI sired, with the goal of developing more COW POWER. We appreciate their wide hips, deep bodies, and productivity with eye appeal. Our other premier cow family came on the scene in 1999 with the birth of Oval F Jasmine J232. Through the years we have identified her superiority and really appreciate her fertility and calf raising ability and especially her sound hard hooves and excellent teat and udder quality for longevity. Remember: The COW MAKES THE DIFFERENCE.

**\* JRW, LLC • Richard Woolwine • Seminary, MS • Manager, Tyson Mareno, (601) 394-8848**

JRW, LLC is located in the pinebelt region of southern Mississippi. The farm is home to 150 purebred Simmental & Angus cattle along with 100 commercial females. The breeding program utilizes an extensive AI & ET program. Our goal is to produce functional cattle that will work in the commercial market as well as the purebred industry. Visitors & calls welcome, we love to talk cattle.

3 embryos guaranteeing 1 pregnancy if work is performed by certified embryologist.

There is one thing for sure, if you see Crocus L105 in a pedigree, you know your gonna get some potent "cow power". Crocus L105 is a baldy outcross that has stood the test of time in the show ring, from the Wesners claiming Reserve overall female at Junior nationals a few years back with a daughter, or more recently at the North American, another daughter of Crocus won her division in the open show. Sale ring toppers are no stranger to this cow either; at the Hudson Pines Sale in October, Circle M purchased a Crocus that was a sale highlight for \$30,000. These embryo's are sired by one of the most sought after young bulls our breed has seen in years, SS/PRS High Voltage. This Cottontail son we sold to Conley and Hartman, has done nothing but impress cattleman from coast to coast. His only outing to date he was named Grand Champion Bull at the American Royal. You can't get much more consistency from the combination of these two breed leading cow families. Help yourself to the finest genetics our breed has to offer!

Here is an exciting opportunity to choose from a trio of fancy show heifer prospects out of a proven cow family with outcross genetics. These Cool Divas have been favorites all Summer, and continue to make friends every day. Up headed, sleek fronted, feminine females that have plenty of rib shape, mass and muscle, and are exceptionally athletic in their movement. We feel there is tremendous show potential in all of these females. The Cool Divas are maternal sisters to Oval F Nicolette N443, that the Adcock family in IL. continue to have success with, and the grand dam, Oval F Jasmine J232, is the mother of the 2011 Res Champion pen of three heifers. The outcross genetics combining this powerful cow family and the Canadian bred New Trend Way Cool 6W offer you unlimited opportunities. Pick your favorite show heifer, then reap the rewards of her genetic potential.

**Homozygous Polled, Homozygous Black. BVD PI negative.**

Selling 2 sets of 3 embryos guaranteeing 1 pregnancy on each set if work is performed by certified embryologist.

We selected Ms Makeover out of the 2011 Wild Wild West sale because we felt she would make tremendous cow like the Cow Camp bunch claimed she would. Now a year later and she has moved to Mississippi after calving in Kansas and then shipped south and has never missed a beat. She is big ribbed with loads of room and volume. No doubt she will sire a few herd sires along the way. This Pacesetter cow should click well with our herd sire Star Player. Star Player continues to excel in our young program plus in the SunsetView herd plus for Genex with all the calves coming easy and with way above average growth. They will perform. The other choice of embryos are by the ABS bull, Sharper Image. The mating should produce some eye appealing progeny with exceptional numbers. Both the matings we are excited about and want to share back genetics in the sale. Thanks for opportunity and call if further questions about this young donor and her possibilities. Progeny will be homozygous polled and a good chance being homozygous black.
